

Solar Thermal Community and Workforce Training

Attention GEO Members:

Join Green Energy Ohio and Sinclair Community College for our **Solar Thermal Community and Workforce Training**

This two day training is designed for tradesmen/women and professionals who wish to enter the solar thermal industry. The focus of the training is on residential domestic solar hot water systems, including an overview of solar resources and fundamentals, common types of systems and components, site selection and installation considerations, incentives payback and hands-on learning through the use of a functional mobile solar hot water lab station. Solar Pathfinder and RESNet Software will also be introduced.

When: February 14-15, 2011

Time: 8:00 am - 5:00 pm

Where: Sinclair Community College
Center for Energy Education
444 W 3rd St.
Dayton, OH 45402

Instructors:

Robert Gilbert
Technical Director of the Center for Energy Education
Sinclair Community College
