Community E-News Alert

## Fire at Bexley Park Damages Playground of Possibilities

### Dear Neighbor:

A fire in the early-evening of Monday, November 1, 2010 severely damaged the City's Playground of Possibilities, a community-built playground, which opened in Spring 2009. The cause of the fire is still under investigation.

**Residents or anyone who may have any information related to the cause of the fire are asked to please contact the South Euclid Police Department at 216.381.1234.**

The Playground of Possibilities was designed by South Euclid children who participated in a series of "Design Day" events. Over a thousand residents, businesses and volunteers participated in the one-week construction of the Playground, which was one of the first community-built, accessible playgrounds in Cleveland's inner-ring suburbs.
