

# JULY 22 & 23 | NOON - 4:00 PM

- 1** Quarry Park Community Garden | 711 South Belvoir Blvd  
Established in 2012.
- 2** Pocket Park | 1080 Argonne Road  
Established in 2013.
- 3** Pocket Park | 1085 Winston Road  
Established in 2013.
- 4** South Lyn Circle Cul-de-sac Garden  
Leaf textures & shades of green contrast with the colorful sedum in this perennial garden which is maintained by one of the homeowners, Naomi, but serves as a gathering place. Neighbors often congregate & catch up on the latest happenings or share gardening tips.
- 5** Victory Friendship Garden | 1427 Victory Drive  
Established in 2013.
- 6** Greenfield Community Garden | Downtown  
Established in 2014.
- 7** Bexley Park Community Garden  
Established in 2014.
- 8** Hinsdale Road Community Garden  
4191 Hinsdale Road. Established in 2012.
- 9** Oakwood Green | 3761 East Antisdale Road  
Oakwood Green is a 21-acre nature reserve donated to the City of South Euclid by First Interstate who created the 7 acre wetland complex & fitness trail. Preserving this portion of the former Oakwood golf course is allowing the original oak forest to reclaim the land, provide habitat for birds & wildlife, & improve air quality. The wetland receives storm water that has been filtered through the bioswales at Oakwood Commons, & is home to ducks & a resident blue heron. 45 minute tours along the trail will begin at 12:00, 1:00, 2:00, & 3:00 pm. Reservations are not required. Rain or shine.
- 10** NDC Grows | 4545 College Road  
Community garden established in 2016.
- 11** Nine Mile Wetland | 1980 South Green Road  
Nine Mile Wetland is a naturalized stormwater detention & treatment area that was originally a segment of Nine Mile Creek. It was converted to a grass covered retention basin to capture rain from storm drains through pipes beneath parts of South Euclid & University Heights. In order to slow the flow, filter, & clean the water before it rejoins the creek buried under Belvoir Blvd & makes its way to Lake Erie, in 2008 the basin was widened & converted to a series of 13 ponds & weirs (small dams) & planted with native trees, grasses, & perennials. Just below the overlook is stand of common milkweed that serves as a monarch butterfly nursery, & ducks are regularly seen in the ponds. Stormwater leaving the basin at the north end is cleaner than the water entering from the south end & Green Road, & the native vegetation supports a robust, diverse population of birds & wildlife.
- 12** Eastway Road Community Garden  
3799 Eastway Road  
Established in 2009.
- 13** Warrendale Road Community Garden  
3915 Warrendale Road  
Established in 2009.
- 14** Colony Road Community Garden  
4069 Colony Road  
Established in 2009.
- 15** Pocket Park | 3750 Colony Road  
Established in 2014.
